Emery Education Campus

Vision/Mission: We at Matthew G. Emery Education Campus believe that the most important component in the educational process is the learner, around whom all resources and activities must be centered. In order to begin the educational cycle, the educator must share high expectations for all students, assess the needs of the learner, and plan instructional activities suitable to meet the various needs of each student. The administration, through the support of the staff and community, must ensure that distractions that prevent learning are removed from the classroom. The learner must demonstrate his/her success through performance.
